

We are specialists in large and small format, digital solutions for:

- Short Run / Variable Data In-Store Signage
- Direct Print Exhibit Graphics
- Complete Transit Signage
- Quality Photographic Prints and Duratrans
- Short Run Displays and Packaging
- Lenticular 3D Printing
- Quick Turn Prototypes
- Opaque White Capability
- Flexible and Rigid Signage
- Grand Format Printing
- Digital Die-Cutting and Routing

At Excelsus, we digitally print directly to, and precisely cut, a wide variety of substrates, both in roll and sheet form.

Our digital process eliminates the need for printing plates and cutting dies.

We can print directly to materials up to 2 inches thick eliminating the need and cost of mounting.

We use a complete, professional, color-managed profiling system ensuring that each project meets your color specifications.

When you put these components together, the possibilities are endless.

Feel free to call us at any time with your needs or questions.
